INTRO- DUCTION

BRITISH CANNABIS™ have worked tirelessly to become the largest independently owned, producer, manufacturer and distributor of legal cannabis-derived products in the UK.

Established in 2015, we have built upon years of knowledge and understanding for both CBD and the wider cannabis compounds allowing us to use techniques and craft products in ways that had never been attempted before.

Having perfected our own cannabis cultivation, which supports product research and development, we can dynamically and compliantly respond to every change in industry regulations; enabling BRITISH CANNABIS™ to bring to market the most effective cannabis supplements and cosmetics possible.

Across our numerous innovations, we have prioritised compliant, accurate and safe products above all else. From our own branded flagship products to the many successful white label brands Powered by BRITISH CANNABIS™ - we are just getting started.

THE COM- PANY

We pioneered change in the UK cannabis industry through our innovations and dedication to compliant, safe and great quality products. When the raw extract did not meet the exacting standards. **We created our own.**

BRITISH CANNABIS™ started as a small family business, where the manufacturing and day-to-day business occurred within the family kitchen. Since then we have grown to accommodate more than 30 employees, two operating facilities with state-of-the-art food and cosmetic cleanrooms and laboratories, a research cannabis farm in Portugal and acquired multiple awards for our very own retail CBD brands.

It's these extensive resources that enable BRITISH CANNABIS™ to be the only Full Spectrum Cannabis Company in the UK with tried, tested and approved cannabinoid products that with a little customisation can be made your own.

Our philosophy has always been, if it doesn't exist, create it.

COMPLI- ANCE

For years BRITISH CANNABIS™ group have been instrumental in influencing the regulatory direction of key legislation by actively getting involved with the EU Commission, member states, and supporting trade bodies securing the position of our business and that of the wider industry.

Underpinning everything, is our demonstration of regulatory compliance. Since March 2021, CBD brands have been reliant on their suppliers securing their regulatory position for Novel Foods. BRITISH CANNABIS™ have 15 validated formulations covering hundreds of CBD opportunities.

Each novel food dossier was composed and written in-house by our decorated regulatory and compliance team. This undertaking is a testament to our knowledge, understanding and confidence in the safety of our products.
